BEAUTY THAT'S MORE THAN SKIN DEEP

With both looks and performance, our new Recovery-300 data protection appliance is that rare combination of form and function that delivers on the most aggressive ROI and TCO expectations.

Recovery-300 is a small attractive desktop form factor appliance that still packs a powerful punch. From its quad processor, 4GB of memory, and four 1.5TB drives arranged in a RAID-10 configuration to its whisper-quiet operational profile, this platform is an IT professional's dream come true. It's ideal for less demanding environments and supports optional USB and eSATA archiving. And with a full complement of features, supported OSs and applications, disaster recovery capabilities, and the industry's best user interface, it delivers value far beyond its size.

Of course, it's this performance that matters most. Recovery-300 offers the same benefits as its rack-mount siblings: support for more than 40 operating systems and applications, hot and cold BareMetal Recovery, optimized compression technology, advanced data-deduplication mechanisms to conserve precious WAN bandwidth when vaulting data offsite, and optional 256-bit AES encryption for security.

FEATURES

CLIENT OPERATING SYSTEMS SUPPORT

Windows, Mac OS X, Linux

APPLICATION SUPPORT

Microsoft Exchange, Microsoft SQL, VMware, Direct NAS

BUSINESS CONTINUITY

Point-in-Time Unstructured (File) Data Protection
Point-in-Time Structured (Application) Data Protection

Windows Dissimilar BareMetal Recovery

MANAGEMENT AND SECURITY

Single Pane of Glass Web-Based Management
Centralized Management of Multiple Appliances
Alert-Based Monitoring
SNMP Traps
SMTP-Based E-Mail Reporting
AES 256-Bit Encryption (Optional)

DISASTER RECOVERY

Electronic Vaulting is optional
D2D2D Rotational Archiving Capable

Recovery-300

Too many data protection solutions make *you* take charge of a complex integration process. They add to your headaches instead of reducing them. If you're tired of complexity, and looking for a full-featured solution that's simple, reliable and fast, you're ready for Unitrends. Beauty that's more than skin deep.

HARDWARE (APPLIANCE PLATFORM)

Maximum Number Servers/Clients	10
Unformatted, Compressed Physical Storage	6 TB (Assumes 2:1 Standard Compression)
Maximum Protected System Content	1.125 TB
Form Factor	Desktop
Environment	Front Room
Drives	4
RAID Technology	RAID-10
Unformatted Storage	3 TB
Archiving Interface	USB 2.0, eSATA
Maximum Archive Set	1.5 TB
CPU	Quad Core
Memory	4GB
Network	1GBit Ethernet
Power Supply	Single 500 W
